

XM Radio is the only independent music I can get in Southern Maryland. This is true since the FCC allowed the Prince Fredrick station to go Spanish. I would like to think that the public would be well served by the FCC to stop allowing anyone Corp. to own more than one station. There is enough money to go around and the smaller the station the more responsive that station is to its public.
Jim Moore

PS if you live in Southern Maryland you know that we only have one station and it is automated.
